Open Education Global, established in 2008, is a member-based, global, non-profit organization supporting the development and use of open education around the world.

OUR MISSION

Promote, support, and advance open education around the world.

OUR VISION

Empowerment through education.

- 400+ institutional and individual members from 60+ countries

Open for Public Good

Open Education Global is an open education steward within the education ecosystem. OEGlobal's primary role is as a connector. We foster knowledge exchange, advance sustainable systemic change and open policies, amplify impact, and connect local open education efforts to global ones.

Regional Ecosystem

The Open Education Latin America Regional Node (OE LATAM) is a community driven network that works cooperatively to establish, utilize and sustain a regional ecosystem that further enhances the development of open education initiatives and practices in Latin America.

Established in 2019 with the support and guidance of open education leaders from nine different countries in the region, the OELATAM is designed to serve the unique needs and challenges of their communities.

The framework fosters four main areas of collective importance:

1. State of the art
2. Professional development
3. Open practices
4. Infrastructure

The Red STEM Latinoamérica, led by the Siemens Stiftung Foundation in collaboration with the Tecnológico de Monterrey, is committed to promoting open, collaborative and social education.

Through the “oe-STEAM Lab” an innovative strategy is being developed that seeks to facilitate a learning platform accessible to all. The objective is to strengthen and focus the efforts of all partner institutions, enhancing visibility and collaborative learning, and documenting best practices.

OBJECTIVES:

- Raising awareness and enhancing visibility of OER
- Capacity building in open education
- Strengthen a STEAM-Latam community

► Collaboration of more than 180 member institutions of 14 countries in the region.

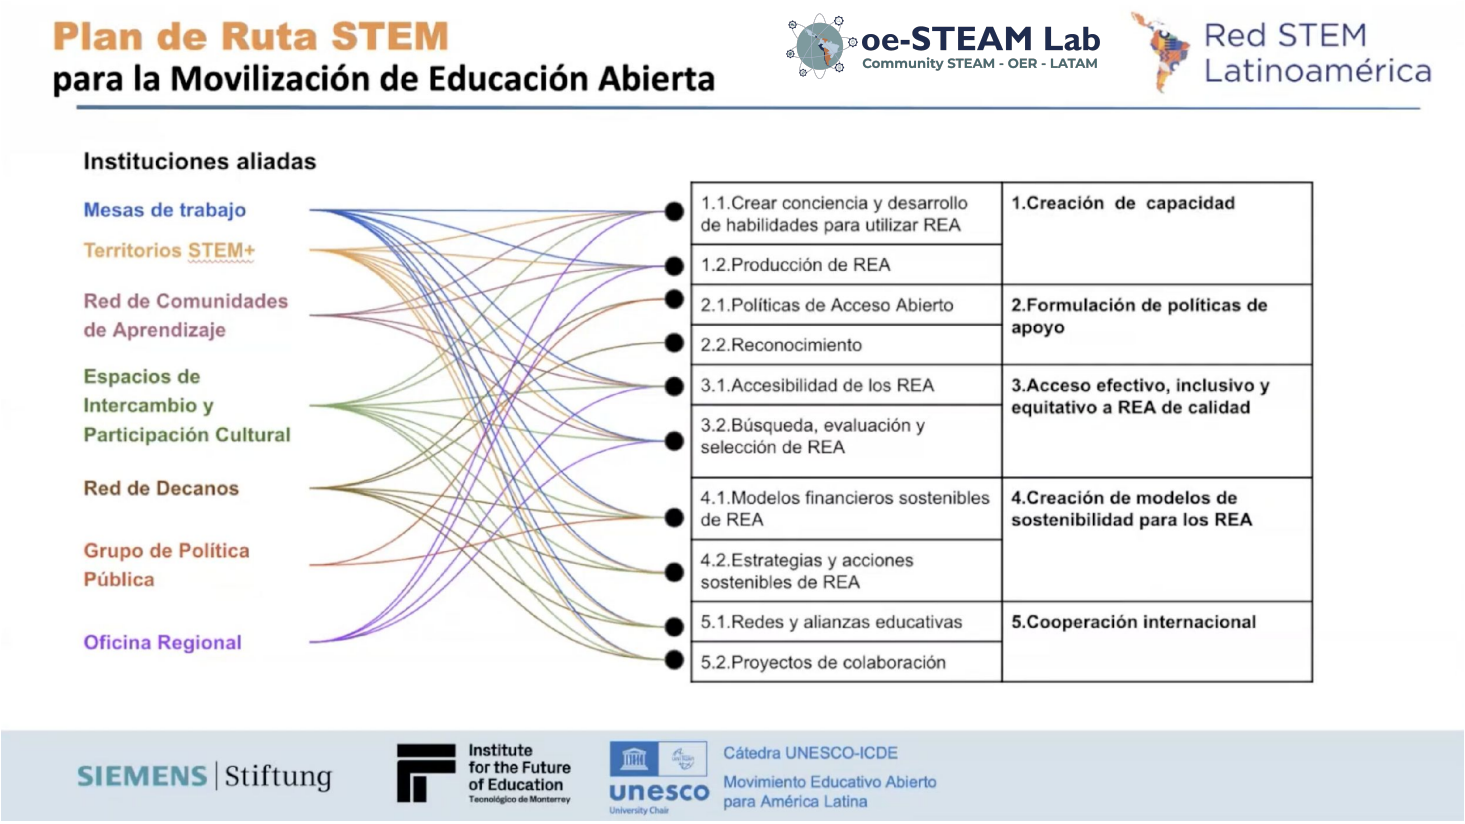
The "**Plan de Ruta STEM para la Movilización de Educación Abierta**" is a roadmap to help build and visualize different pathways of development and action using the UNESCo OER Recomendation as a framework.. The roadmap helps find ways to promote, create, implement, communicate and sustain development of open education in the region.

Comprehensive strategy that recognizes the ecosystem of the open educational movement that exists in the Latin American STEM Network:

- Community of collaboration
- Portal CREA
- open Educational Resources (OER)
- Processes of open education and its benefits.



"Segunda Reunión Regional de la Red STEM Latinoamérica 2024". Exposición Plan de Ruta STEM para la Movilización de Educación Abierta. (Junio 2024). María Soledad Ramírez-Montoya y Vladimir Burgos Aguilar

OBJECTIVE:

Create an open, collaborative and social platform in which all institutions can share their best practices and learn from each other.

Based on the UNESCO OER Recommendation, this plan centers on the five action areas::

- Capacity Building
- Develop supportive open policies
- Effective, inclusive and equitable access to high quality OER
- Create sustainability modelos for OER
- Promote and facilitate international cooperation

Cátedra UNESCO-ICDE "Movimiento Educativo Abierto para América Latina"

- Launched in 2014
- Promote open access in Latin America with networks and working groups that promote the production, visibility, dissemination and mobilization of knowledge, academic and scientific production.

THANK YOU!
